# MANOJ A

## About Me

Hi, I'm Manoj A, a recent BSc graduate in Mathematics and Statistics with a strong interest in data analysis. During my university studies, I have experience using Excel, Python, R, and Google Sheets to solve complex problems. In one of my projects, I analyzed large datasets using R to identify patterns and trends, which helped improve decision-making for an academic research task. I love working with data to uncover insights and would be excited to apply my analytical skills in a real-world setting.
